Rocky Mountain Beeplant - <i>Cleome serrulata</i>	A - Summer				X
Rocket Larkspur - <i>Delphinium consolida</i>	A - Summer				X
Wild Blue Iris - <i>Iris missouriensis</i>	P - Summer				X

**Memorandum of Understanding  
(Applicable for the purchase of ≥ 10 acres of seed)**

Bayer CropScience LP ("BCS") and [redacted] ("Partner") recognize that pollinators are essential to agriculture as well as urban and rural landscapes, making their protection critical to the future of the world's food supply. In an effort to promote and protect the overall health of pollinator species, BCS and Partner enter into this agreement for the activities outlined below.

The purpose of this Memorandum of Understanding ("MOU") is to clearly identify the roles and responsibilities of each party as they relate to the project. The term of this MOU shall be effective upon signature by all parties and will continue until such time that all of the planned pollinator activities and expenditure of any BCS funding is complete.

**BCS will:**

- Provide Feed a Bee plot sign to partners who purchase Bayer Pollinator Mix (a minimum of 10 acres) from Ernst Conservation Seed. Partners will receive 1 plot sign per 5 acre, but will have opportunity to purchase additional signs at their cost if desired.
- As applicable issue press releases in conjunction with partner to announce projects.
- Display partner's logo/name in the Bayer Bee Care Center and in various communication materials that may include but is not limited to Bayer Bee Care Website, slide presentations and social media platforms.
- Provide partner with Feed a Bee logo and Bayer Bee Care logo for use.
- Serve as a spokesperson, at the request of Partner, if availability allows, to support pollinator and/or business activities.

**Partner will:**

- Order and plant Bayer Pollinator Wildflower mix from Ernst Conversation Seed.
- Display Feed a Bee plot sign.
- Provide BCS with a business logo for promotional materials.
- Tag social media activity related to the partnership or Feed a Bee with #feedabee.
- Serve as a spokesperson, at the request of BCS and if availability allows, to support pollinator and/or business activities.
- As applicable when related to the project, provide a link to the Bayer Bee Care website (<http://beehealth.bayer.us/home>) on partner's website.

Through this letter and acknowledgment, all parties agree each party may speak publically about the project and our work together to promote and protect pollinators.

Agreed to and acknowledged by an authorized representative
